

Summary President meeting in Holland on the 31th of January and the 1th of February

The evaluation about the middle reports was for each country positive.

Fairy tales;

The digital book "Sammy and the mountain king" is ready and is on the webpage. This year we are making another story digital. It will be the story about the shoemaker.

We will print a book with all the fairy tales in it. Spain and Hungary are going to look in which country it is the most cheapest to print a book. In about two books they will know. They inform us about the outcomes.

Next to the digital fairy tales, there will also be a book version.

Every country has to think about the number of copies they want of the book(for the school, students, library, important persons,...).

Webpage;

Roldan will add parts to the webpage. A document for the dropout rates, for traveling and for the new book when it is finished.

Dictionary;

4th of march; a new chapter for the audio book will be ready. When it is finished put it on Dropbox.

On the webpage there will be add a piece of the schools. The information about the schools comes from the leaflet.

Soon there will be a printed version of the dictionary. Each country has to check if everything is correct in the dictionary. Check also the digital dictionary. When it isn't correct make sure that you make it clear which word it is and correct it.

Dropout rates;

How to prevent it and what works well. Each country writes a piece about how it is in their own country. Add it to the webpage when it is ready.

The environment;

Holland uploads their powerpoint. The other countries will do that after their presentation in Spain.

Skype;

Children have to put something on paper. Do they like using the skype, how does it go? We place the results on the webpage.

Twinspace;

It doesn't work this way. We must use it every week (it is written in the project).

Children have to talk about all the topics and give comments about the topics.

The dates to chat/give comments are the same as the skype dates. The children that don't skype can work with the twinspace.

On the e-twinning we don't place products. We place the products on the webpage.

Europass;

We don't have to upload it to the webpage. Put it in the map with the documents of the project.

World Books Day

It is on the 23th of April. We are going to celebrate it in Spain with our own fairy tale book.

Manual of the teaching/learning/training activities;

Every country writes a piece about the teaching/learning/training activities they gave during the meeting in their own country.

Roldan wants to know the names of the persons that went to the different meetings.

Next project;

The Woldschool will not take part of a new project in the future. Parents finding it very difficult that their children go abroad because of all the things that happened the last year in Europe.

Cyprus, Finland, Denmark, Hungary and Spain like to work again on a new project for the year 2018. Not the next year.

Roldan asked who wants to be the new coordinator for the next project. He will look for new partners.
