

Children in a Europe of 2020

6TH REPORT

MAIN

COMMITTEE

Erasmus+

THE MAIN COMMITTEE AFTER THE MEETING IN SPAIN

19TH APRIL 2017

It was a learning and teaching activity in which participated children from all countries involved in the project.

Coordinators of the project also meet during the learning and teaching activity in Spain and discussed about the assessment of the project, the final report, the possibility of a new project in the future, etc.

FAIRY TALES: We have finished our new three stories and we put into practice the story “The giants’ fashion factory”. We had a performance with puppets and all children participated in it. Some of them decorated the playground, other children made the puppets and the rest participated in the performance, so all of them were involved in this activity.

DICTIONARY: We have finished our dictionary with vocabulary and expressions in all languages involved in the project. We put it into practice in the activity that took place on Thursday 6th April. We created different stands, one per country. In every stand we had some kids wearing typical clothes and some typical food to taste. Children had to use the expressions included in our dictionary in the mother language of the stand that they were visiting in that moment.

TECHNOLOGIES TO PRESERVE THE ENVIRONMENT: We worked on the second topics chosen for this year, except the Dutch one, since we focused on it during the learning and teaching activity in Holland. We made experiments about the topics and we visited a solar power plant near the Spanish school to put into practice what we had learnt all over the year. It was the Spanish topic and they talked to the man in charge of the plant, so he explained us how it worked.

MANUAL WITH DIFFERENT WAYS OF LEARNING AND TEACHING LANGUAGES: We had different sessions in Spain to analyze their methodology. We analyze the way they teach CLIL subjects and other lessons to include information in our manual.

WORLD BOOK DAY: We celebrated The World Book Day during the learning and teaching activity in Spain. We had a performance there related to one of our own stories (The giants’ fashion factory) worked in the topic “Fairy tales” so we related it to this important day.

WEBSITE: We will continue with the work on the website. We will upload all materials, pictures and evidences of the work done to the website. We need to much time to upload everything to the website, so we will finish our work on the website after the final report.

SKYPE: We will upload several children's comments to this section.

BUDGET: The Commissions have controlled the budget in every country very well. It wasn't necessary to look for external money since everything was detailed in the project. We followed it and we succeeded.

TIME MANAGEMENT: We have done the activities as it is detailed in the project, so it worked well.

MOBILITY: Everything was really well arranged by the host country, and we had different buses to get to school, since it is a rural area and there is no public transport. The place where we stayed (Valverde del Camino) wasn't very close to school, but it was the only place to stay nearby for so many people. The balance among quality and price was very good. There were lots of activities to put into practice our 4 main products with children and we had enough time to analyze their ways of learning and teaching for our manual.

DISSEMINATION: All activities will be available in the website of the project and there are several reports on local newspapers. We visited the 3 Town Halls because it is a rural school and 3 villages belong to the school. We visited Doñana and we met the Delegate of Education in Huelva. There is a section called Medias in the website and "Children in the news" where all news related to the project are available.

IMPACT: The meeting had a strong impact in the whole community. We were welcome by the Majors and the whole school community participated in lots of activities with us during the week. As it is mentioned in the previous section we met the Delegate of Education. The impact of the meeting and the whole project was great.
